A2 A Styrofoam insert to fit inside the headphone package is shown below.

Complete the full-size sectional view **A-A** of the insert.

[5]

sectional view **A-A**

A3 The insert will be made from two blocks of Styrofoam as shown below.

(a) State **one** reason why Styrofoam is a suitable material for the insert. [1]

.....

(b) The insert will be made using CAD/CAM. [1]

Name **one** item of CAM equipment that could be used to cut the pieces for the insert. [1]

.....

(c) Name **one** adhesive that could be used to stick the two Styrofoam pieces together. [1]

.....

Section B

Answer **one** question, **either** Question **B4** or **B5**, from this section.

B4 Orthographic views of a headphone stand are shown below.

(a) Complete the exploded isometric view of the headphone stand to a scale of 1 : 2. [12]

exploded isometric view

(b) A design for another headphone stand is shown below.

The headphone stand is to be made from three pieces of 6 mm acrylic that slot together.

Part	Drawing
Base Quantity: 2	
Upright Quantity: 1	

(i) Complete the table above to show the parts needed to make the headphone stand to a scale of 1 : 2. [7]

(ii) A half-size model of the headphone stand is to be made before making the final design from acrylic.

State a suitable graphic material that could be used to make the model. [1]

.....

(c) Lettering is to be added to the headphone stand.

(i) Complete the lettering below by adding the missing letters of HEADPHONES. [3]

HE OPHO ES

(ii) The lettering will be printed onto the headphone stand using thermochromic ink.

Describe how thermochromic ink works. [2]
