

Section A
Answer all questions in this section.

A1 A gym membership card is shown below.

Complete the drawing of the gym membership card to a scale of 2:1 by adding:

- (a) the card outline [2]
- (b) the isosceles triangle [2]
- (c) the heart shape [2]
- (d) the weights image [2]
- (e) the title outline [2]
- (f) the octagon. [3]

A2 (a) The membership cards are produced using a computer.

A photograph of the gym member needs to be added to the membership card.

Explain how the photograph could be obtained and transferred onto the membership card.

.....
.....
.....
.....
..... [3]

(b) The membership cards are printed onto thin plastic sheet.

(i) State **one** benefit of using thin plastic sheet for the membership cards.

.....
..... [1]

(ii) Name a suitable thin plastic sheet that could be used to make the membership cards.

..... [1]

A3 A wallet for holding the membership card is shown below.

The wallet is made from thin card.

Complete the full-size development (net) of the wallet.

[7]

development (net)

Section B

Answer **one** question, **either** question **B4** or **B5**, from this section.

B4 Orthographic views of a gym changing room are shown below.

(a) Complete the planometric view of the gym changing room to a scale of 1:20. [12]

(b) A clothes hanging rail is also used in the gym changing room.

The clothes hanging rail is made from hardwood and has two aluminium hooks.

One of the hooks and part of the clothes hanging rail are shown below.

(i) Render the rail to look like hardwood. [3]

(ii) Render the hook to look like aluminium [3]

(c) Complete the estimated two-point perspective view of the hanging rail and hooks. [7]
