Paper 1 Written Examination

October/November 2022

MARK SCHEME

Maximum Mark: 70

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2022 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **20** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Introduction

Most questions are marked holistically using levels of response mark schemes. The marks awarded for an answer are usually based on a judgement of the overall quality of the response, rather than on awarding marks for specific points and accumulating a total mark by adding points.

Inevitably, the mark scheme cannot cover all responses that candidates may make for all of the questions. In some cases, candidates may make very strong responses which the mark scheme has not predicted. These answers should nevertheless be credited according to their quality.

Levels of response

For answers marked by levels of response, the following is intended to describe the quality of the response required (level of skill that should be demonstrated) for the award of marks at different points in the mark range for the question.

In the levels of response mark scheme positive achievement is being rewarded.
For answers marked by levels of response:

- Marking grids describe the top of each level.
- To determine the level** – start at the highest level and work down until you reach the level that matches the answer.
- To determine the mark within the level**, consider the following:

Descriptor	Award mark
Consistently meets the criteria for this level	At top of level
Meets the criteria but with some slight inconsistency	Above middle and either below top of level or at middle of level (depending on number of marks available)
Just enough achievement on balance for this level	Above bottom and either below middle of level or at middle of level (depending on number of marks available)
On the borderline of this level and the one below	At bottom of level

Mark scheme

All of the questions are based on sources which are available to candidates as an Insert to the examination paper. It is therefore very important to study this material prior to marking to become familiar with the context of the questions.

Annotations

All scripts and all responses must be annotated to show how and where marks have been awarded. The practice scripts indicate the amount of annotation expected.

The number of ticks used does not need to tally with the mark achieved. **Every question and response must be annotated in some way.** The mark scheme indicates the most likely annotation to be used with each question.

Annotation should be within the candidate's text or the right-hand margin of the response as it appears in the marking screen.

For scripts marked on RM Assessor, a selection of the following on-screen annotations are available.

Annotation	Meaning
	Correct, creditworthy point
Eval	Evaluation
DEV	Development
BOD	Benefit of doubt given
	Incorrect point
	Unclear/confused point
JU	Justification
	Omission mark, more required
I	Interpretation
Vertical wavy line	Irrelevant
	Highlighter
REP	Repetition
	Comment Box
NAQ	Not Answered Question
SEEN	Confirms page or response seen by examiner

IMPORTANT NOTE ON DEVELOPED AND UNDEVELOPED POINTS

A developed point is one which is explained, or supported with evidence, usually drawn from the sources or the candidate's experience. For example:

Example 1

- 1a Undeveloped point - A strength of Uki's argument is the use of evidence from the World Bank
- 1b Developed point - A strength of Uki's argument is the use of evidence from the World Bank which comes from a credible source and is likely to be accurate. It can be trusted.
- 1c Undeveloped point - A weakness of the argument is the use of personal testimony from experience.
- 1d Developed point - A weakness of the argument is the use of personal testimony from experience. This experience may not apply to many other people and could be biased. It is not strong evidence.

Example 2

- 2a Undeveloped point – promoting lifestyle changes is not a good idea because it takes too long.
- 2b Developed point - promoting lifestyle changes is not a good idea; it takes too long because some people may ignore the advice given by governments and not bother to change their behaviour
- 2c Developed point – encouraging governments to work together is the best solution as governments can share ideas and resources. This is supported in Source 4 when Uki says that cooperation between countries will prevent human suffering and reduce conflict.

Question	Answer	Marks
1(a)	From Source 1, identify life expectancy in Japan in 2019. Main Annotations    Candidates should identify the following from Source 1: • 84 years 1 mark should be awarded for identifying the above. <i>Further guidance – the only acceptable answer is listed above. However, candidates may use their own words.</i>	1
1(b)	From Source 2 identify two factors influencing life expectancy. Main Annotations    Candidates may identify the following factors from source 2: • Level of economic development. • Housing conditions. • Quality of medical care. • Sanitation. • Diet. • Health education. • Lifestyle. 1 mark should be awarded for each correctly identified factor up to a maximum of 2 marks. <i>Further guidance – the only acceptable answers are listed above. However, candidates may use their own words.</i>	2

Question	Answer	Marks
1(c)	Which factor influencing life expectancy do you think is most important? Explain why. Main Annotations    Indicative content: Candidates may identify one of the following factors: • Level of economic development. • Housing conditions. • Quality of medical care. • Sanitation. • Diet. • Health education. • Lifestyle. Candidates may give the following reasons, any of which could be used, to justify their choice: • Has greatest impact. • Affects most people. • Ethically or morally most justifiable. • Has multiple positive consequences. • Other reasonable response. <i>Further guidance – candidates are most likely to discuss factors from the source as listed above. However, the assessment is focused mainly upon their reasoning / justification and therefore additional reasons should be credited.</i> The following levels of response should be used to award marks: Level 3 (3 marks) Good response Clear explanation of importance explicitly linked to the selected reason Level 2 (2 marks) Reasonable response Some explanation of importance. The link between the explanation and a reason may be implicit/unclear at times. Level 1 (1 mark) Limited response A reason is identified but with limited or no explanation of importance. Often unclear. Level 0 (0 marks) No relevant response or creditworthy material.	3

Question	Answer	Marks
1(d)	Explain why life expectancy is a national issue. Main Annotations     Indicative content: Candidates are likely to discuss the following national issues, drawing upon the information in Sources 1 and 2: • It measures the health of a country. • It affects the economy. • Healthier citizens may mean better workers. • Disease may spread in the country if health education is not given. • Poor housing conditions may affect the living standards in a country. • Any other reasonable response. The following levels of response should be used to award marks: Level 3 (5–6 marks) Good response Clearly reasoned, credible explanation. The national dimension is explicit. Level 2 (3–4 marks) Reasonable response Some reasoned explanation. The national dimension is implicit at times. Level 1 (1–2 marks) Limited response Limited reasoning and explanation. Explanations are partial, generalised and lack clarity. The national dimension is not apparent. Level 0 (0 marks) No relevant response or creditworthy material.	

Question	Answer	Marks
2(a)	'We need to spend more money on healthcare locally.' What are the strengths and weaknesses of the argument supporting this claim? Main Annotations     Indicative content Candidates are likely to discuss the following evaluative points relating to Source 3: Strengths: • Starts by giving his name and his position of being in charge. • Emotional appeal to families about the health of children and the elderly. • Refers to his television appearance. • Suggests improving health education and giving people care at home. • Refers to a particular newspaper. • Gives statistic about the area's future population. Weaknesses: • Does not give specific details about experience as a doctor. • Does not indicate how he knows it has been busy – no data. • General comment about children and the elderly – no data to support this comment. • Does not indicate how much it will cost to train medical staff. • Comments that 'some people' will argue about housing but no details given. The following levels of response should be used to award marks: Level 3 (5–6 marks) Good response Clearly explained and credible evaluation of the argument/evidence; usually two (or more) developed points clearly linked to the issue, with some other undeveloped points; or a wide range (four or more) of undeveloped points. Evaluation is clearly focused on the reasoning and/or evidence, its strengths and weaknesses and the way it is used to support the claim. Material from the sources is used as evidence to support the evaluation; some reference to the evidence and/or arguments in the source e.g. quotation/summary of ideas.	6

Question	Answer	Marks
2(a)	Level 2 (3–4 marks) Reasonable response Some evaluation of the argument/evidence, its strengths and/or weaknesses, and the way it is used to support the claim. The response usually contains one (or more) developed point(s), with some other undeveloped points. Some (two or more) undeveloped points may be sufficient to enter this level. Some material from the sources may be used as evidence to support the evaluation. The response may occasionally lack some clarity and be difficult to follow. Level 1 (1–2 marks) Limited response Limited evaluation of the argument/evidence which is often unsupported and asserted. The response may be tangential, partial, generalised and lack clarity. It usually contains one or two undeveloped points only. Answers at this level may repeat source material with little understanding. Level 0 (0 marks) No relevant response or creditworthy material.	

Question	Answer	Marks
2(b)	‘People in this area are healthier than they were a year ago.’ How could you test this claim? You may consider the types of information, sources of evidence or methods you might use. Main Annotations     Indicative content: Candidates are likely to discuss the following ways to test the claim stated in Source 3. Possible types of information: • Compare statistics/information on health services. • Data from government, local communities. • Individual testimony or personal experience. • Material from health organisations, for example world health organisations. • Other relevant response. Possible sources of information: • National and local governments and their departments. • International organisations, e.g. United Nations; UNESCO. • Experts in health. • Research reports. • Pressure groups, charities and NGOs. • Media and the internet. • Other relevant response. Possible methods: • Review of secondary sources/literature/research/documents. • Interview relevant experts, local doctors and healthcare workers. • Internet search. • Questionnaires. • Surveys. • Other relevant response. The following levels of response should be used to award marks: Level 4 (7–8 marks) Very good response Clearly reasoned, credible and structured explanation of a range of ways to test the claim. The response usually contains three (or more) developed points and may contain some undeveloped points. The response is clearly and explicitly related to testing the claim.	8

Question	Answer	Marks
2(b)	Level 3 (5–6 marks) Good response Reasoned and mainly credible explanation of ways to test the claim. The response usually contains two (or more) developed points and may contain some undeveloped points. The response is related to testing the claim. Level 2 (3–4 marks) Reasonable response Some reasoning and explanation of ways to test the claim. The response usually contains one (or more) developed point(s), and/or a range of undeveloped points. The response may lack clarity. The response is implicitly related to testing the claim. Level 1 (1–2 marks) Limited response Limited explanation of ways to test the claim. The response contains one or two simple, undeveloped and asserted points. There is little relevance in the response to testing the claim or the methods, sources and types of information are generally not appropriate for the claim being tested. Level 0 (0 marks) No relevant response or creditworthy material. <i>Further Guidance – responses that do not link explicitly to the issue/context and are simply a list of research methods/sources/types of information should not be awarded higher than Level 2.</i>	

Question	Answer	Marks
3(a)	Identify one opinion from Zama’s statement. Explain why this is an opinion. Main Annotations     <i>An opinion is a thought or belief about something or someone; a view which is subjective and not necessarily shared by other people, often based on assertion.</i> Indicative Content: Candidates may identify one of the following from Zama’s statement. • Families need to provide a healthy diet (for their children) • If people work hard/get a good job they will be able to afford to pay for good health care/healthy food • I know how important it is for people to stay healthy. • I believe it is important for people to take responsibility for their own health. • This is the best way to protect health for the future. • It is the individual’s responsibility to care for themselves • It is the government’s responsibility to keep people healthy • It is everyone’s responsibility to look after themselves/their family • This is wrong. Award 1 mark for correctly identifying one of the above. Award 1 mark for a response that demonstrates a clear understanding of an opinion. <i>Further guidance – note that the only acceptable answers are listed above. However, candidates may use their own words.</i>	2

Question	Answer	Marks
3(b)	Explain why Sinta's statement might be biased. Main Annotations     <i>Bias is a tendency or prejudice for or against something: an attitude of strong like or dislike: an unbalanced approach not prepared to consider counter arguments or other points of view.</i> Indicative Content: Candidates may identify one of the following reasons for bias from Sinta's background: • She works for the local government • She may want to promote/praise her employer • She has a vested interest in local government • She wants to make her job sound important Candidates are likely to identify the following evidence of bias from Lars' statement: • Lack of balance - for example no focus on negative use of digital data. • Uses extreme examples to reinforce the point – 'seriously ill or injured', 'natural disaster' • Downplaying/contradicting the other side of the debate – 'I disagree with The following levels of response should be used to award marks: Level 3 (3 marks) Good response A clear and full explanation of why the statement may be biased supported with evidence from the statement. The response contains two (or more) credible points. Level 2 (2 marks) Reasonable response A basic or partial understanding/explanation of why the statement may be biased. The response contains one credible points. Level 1 (1 mark) Limited response A limited or unclear explanation of why the statement may be biased. Level 0 (0 marks) No relevant response or creditworthy material. <i>Further guidance – note that the only acceptable answers are listed above. However, candidates may use their own words.</i>	3

3(c)	Which argument is more convincing, Zama's or Sinta's? Main Annotations     DEV BOD J Indicative content: Candidates are expected to evaluate the arguments presented in Source 4 and compare their effectiveness. They should make a supported judgement with some explanation about which person has the most convincing argument. Candidates may support their judgement by considering: Strength of reasoning: • logic • structure • balance • claims Use of language: • tone – emotive, exaggerated, precise • clarity Evidence: • range of information and depth • relevance • sufficiency – sample • source – media; internet • date – how recent • different types of information – fact, opinion, value, anecdote • testimony – from experience and expert Sources of bias • local interest • economic • personal values • experience Likely consequences of the ideas presented Acceptability of their values to others • how likely other people are to agree with their perspective/view The following levels of response should be used to award marks: Level 5 (13–15 marks) Very good response Wide range of clear, credible and well explained points about which argument is more convincing. Coherent, structured evaluation of both arguments with clear comparison.	15
------	--	----

Question	Answer	Marks
3(c)	The response usually contains three (or more) developed evaluative points and may include some undeveloped points. Material from the sources is used as evidence to support the evaluation; clear, frequent reference to the evidence and/or arguments in the source e.g. quotation/summary of ideas. A judgement is reached. Level 4 (10–12 marks) Good response A range of clear, explained points about which argument is more convincing. Evaluation of both arguments, with some comparison. The response usually contains two (or more) developed evaluative points and may include some undeveloped points. A wide range (four or more) of undeveloped but clearly appropriate points may be sufficient to enter this band at the lower level. Material from the sources is used as evidence to support the evaluation; some reference to the evidence and/or arguments in the source e.g. quotation/summary of ideas. A judgment is reached. Level 3 (7–9 marks) Reasonable response Some points about which argument is more convincing with some explanation. Some evaluation of both arguments, with an attempt at comparison or a very good evaluation of only one argument. Judgements and evaluative points are partially supported or asserted. The response usually contains one (or more) developed evaluative points, possibly with some undeveloped points; three (or more) undeveloped points may be sufficient to enter this band at the lower level. Some material from the sources may be used occasionally as evidence to support the evaluation. The response may occasionally lack some clarity and by difficult to follow at times. A judgement is reached. Level 2 (4–6) Basic response A few points about which argument is more convincing. There may be only one argument considered in any detail, with little attempt at comparison. Evaluative points are mainly asserted or descriptive and lack clarity/relevance at times. The response usually contains two (or more) undeveloped points. A judgement may be reached.	

Question	Answer	Marks
3(c)	Level 1 (1–3 marks) Limited response Limited and unsupported points about which argument is more convincing. The response considers the arguments briefly and/or tangentially. There is little clarity. Answers at this level may repeat source material with little understanding or simply agree/disagree with the arguments presented. The response may not contain any clear evaluative points. Level 0 (0 marks) No relevant response or creditworthy material. <i>Further Guidance</i> <i>Responses that give a very good evaluation of only one argument may achieve Level 3 but no higher.</i>	

Question	Answer	Marks
4	A government wants to improve the health of everyone in their country. The following actions are being considered: • Teach families about healthier lifestyles. • Spend more money on healthcare and hospitals. • Improve employment opportunities. Which one of these suggestions would you recommend to the government and why? Main Annotations J     DEV BOD Indicative content: Candidates are expected to make a judgement about the improvements of health using reasons and evidence to justify their choice. Candidates may use and develop the material found in Sources 1 to 4 but should go beyond simply repeating or recycling without adaptation. Other material may be introduced but is not necessary to gain full marks. Candidates may consider some of the following: • Reference to scale of impact on improvement of health. • Reference to different consequences and implications for individuals/groups/government. • How long it might take to make a difference. • Barriers to change. • The power of collective action, e.g. Cooperation between countries over improvement of facilities. • The influence of individuals and groups on decision making. • The role of vested interests and power differences. • Potential conflicts of interest. • Difficulties in planning and coordinating improvements. • Cost and access to resources to implement change. • Other reasonable response. The following levels of response should be used to award marks: Level 5 (20–24 marks) Very good response Clear, well supported, and credible explanations about the recommended course of action. Different arguments and perspectives are clearly considered. The response contains a wide range of clearly reasoned points and/or evidence to support the views expressed, usually with four (or more) developed points, and some undeveloped points. The response is well structured, and a clear judgement is reached.	24

Question	Answer	Marks
4	Level 4 (15–19 marks) Good response Clear, supported and mainly credible explanation about the recommended course of action. Different arguments and perspectives are considered. The response contains a range of reasoned points and/or evidence to support the views expressed, usually with three (or more) developed points, and some undeveloped points. The response is generally well structured, and a judgement is reached. Level 3 (10–14 marks) Reasonable response Some supported explanation about the recommended course of action. Different arguments and perspectives are included. The response contains some points and/or evidence to support the views expressed, usually with two (or more) developed points, and some undeveloped points. The response is partly structured and occasionally difficult to follow; an attempt is made to give an overall judgement. Level 2 (5–9 marks) Basic response Basic explanation about the recommended course of action. Different arguments are included; perspectives, if present, may be unclear. The response mainly relies on assertion rather than reason or evidence; usually with one (or more) developed point(s) or a range of undeveloped points. The response is generally unstructured and difficult to follow. A judgement may be attempted. Level 1 (1–4 marks) Limited response Limited, unsupported explanation about the recommended course of action or some discussion about the topic in general. Different arguments may be included. Often tangential, generalised and lacking in clarity. Unstructured and often difficult to follow. Level 0 (0 marks) No relevant response or creditworthy material.
