Newspaper report

Residents of Kamalpur protest against a local cement factory

Villagers have accused the factory owners of polluting the environment and causing health problems for children at a nearby school. The villagers have protested in front of the factory gates blocking traffic for two hours.

A representative of the villagers accused the factory owners of using old machines. These released dust and cement particles into the air, which has caused breathing difficulties and eye diseases.

He added that the dust has reduced the fertility of their land.

The protesters said that the Kamalpur Primary School has been affected by the factory because the children have been unable to concentrate due to the noise.

They also said that large trucks carrying stones and other materials have damaged the roads and held up traffic.

Fig. 1.3 for Question 1

Resident questionnaire

We are doing a survey about the cement factory as part of our Geography fieldwork. Please will you answer the following questions?

Which age group are you in? Tick (✓) the answer.

under 21	
21-40	
41-60	
over 60	

Section A

The cement factory causes problems in Kamalpur. For each problem give a score between 1 and 5 (1 = little concern and 5 = high level of concern).

problem	level of concern (1 to 5)
air pollution	
dangerous traffic	
looks ugly	
noise	
trees are chopped down	

Section B

The following ways have been suggested to reduce the negative impacts of the factory. Which method do you think is best? Tick (✓) your chosen method.

make a law to reduce the amount of air pollution from the factory	
give grants and loans to the factory owner to buy new machinery	
close down the factory	
build a clinic in Kamalpur and employ doctors to treat breathing difficulties and eye diseases	

Thank you for your time.

Table 1.1 for Question 1

Results of Section A in the questionnaire

problem	level of concern total score
air pollution	428
noise	375
dangerous traffic	294
looks ugly	215
trees are chopped down	164

Table 1.2 for Question 1

Average score given by each age group (out of 5)

problem	age group			
	under 21	21–40	41–60	over 60
air pollution	4.4	4.0	4.4	3.9
noise	3.6	3.9	3.7	4.1
dangerous traffic	2.7	2.6	3.9	2.9
looks ugly	2.0	2.8	1.8	1.9
trees are chopped down	2.6	1.7	1.2	1.5

Table 1.3 for Question 1

Possible methods to reduce the negative impacts of the factory

method	percentage of people choosing
make a law to reduce the amount of air pollution from the factory	35
give grants and loans to the factory owner to buy new machinery	14
close down the factory	22
build a clinic in Kamalpur and employ doctors to treat breathing difficulties and eye diseases	29

Fig. 1.7 for Question 1

Student's bi-polar survey sheet

distance away from the cement factory km							
problem caused by cement factory	positive description	+2	+1	0	-1	-2	negative description
air pollution	no air pollution						air is badly polluted
noise	no noise						continuous loud noise
traffic	no large vehicles						many large vehicles
visual impact	factory is not visible						factory spoils the view of the area
