Paper 4 Cost and Management Accounting

May/June 2026**MARK SCHEME**Maximum Mark: 50

Published

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

This document consists of **10** printed pages.

General marking principles

All examiners must apply these marking principles when marking candidate responses.

1	Examiners must award marks for each response in line with: - the specific content defined in the mark scheme - the specific skills defined in the mark scheme or in the level descriptions - the standard of response required as exemplified by the standardisation scripts.
2	Examiners must award whole marks (not half marks, or other fractions).
3	Examiners must award marks positively . This means that: - marks are not deducted for errors or omissions - marks are awarded for correct/valid answers as defined in the mark scheme and also for other valid answers which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate - the quality of spelling, punctuation and grammar are judged only when the mark scheme indicates that these features are specifically assessed in the question. However, the meaning of all responses must be unambiguous.
4	Examiners must consistently apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.
5	Examiners must use the full range of marks defined in the mark scheme, unless limited by the quality of the candidate responses seen.
6	Examiners must award marks according to the mark scheme and must not award marks with grade thresholds or grade descriptions in mind.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	Correct and relevant point made in answering the question.
	Incorrect point or error made.
LNK	Two statements are linked.
REP	Repeat
A0	An extraneous figure
N0	No working shown
AE	Addition error (Arithmetic error)
R1	Required item 1
R2	Required item 2
OF	Own figure

Annotation	Meaning
EVAL	Evaluation
NAQ	Not answered question
BOD	Benefit of the doubt given.
SEEN	Noted but no credit given
Highlight	Highlight
Off page Comment	Off page comment

Abbreviations and guidance

The following abbreviations may be used in the mark scheme:

OF = own figure. The answer will be marked correct if a candidate has correctly used their own figure from a previous part or calculation.

W = working. The working for a figure is given below. Where the figure has more than one mark associated with it, the working will show where individual marks are to be awarded.

CF = correct figure. The figure has to be correct i.e. no extraneous items have been included in the calculation

Extraneous item = an item that should not have been included in a calculation, including indirect expenses such as salaries in calculation of gross profit when there is one **OF** mark for gross profit'

Curly brackets, }, are used to show where one mark is given for more than one figure. If the figures are not adjacent, each is marked with a curly bracket and a symbol e.g. }*

row = all figures in the row must be correct for this mark to be awarded

Marks for figures are dependent on correct sign/direction

Accept other valid responses. This statement indicates that marks may be awarded for answers that are not listed in the mark scheme but are equally valid.

1(d)	Advise the directors whether or not the advertising budget should be cut. Justify your answer. Incurring the expenditure will adversely affect the cash flow / not incurring the advertising will improve the budgeted cash flow. (1) There are other ways of boosting sales, such as reducing selling price. (1) The increase in sales in November and December is only an estimate after incurring the advertising expenses. (1) There may not be enough resources to cope with the expected increase in sales. (1) There is a risk that the advertising will not succeed. (1) Advertising can strengthen the image of the product / maintain market share / increase sales. (1) Cash will increase if the advertising is successful. (1) Max. 6 for comments. Decision supported with a comment (1) Accept other valid responses.	7

Question	Answer	Marks																														
2(a)	Calculate the <u>unit</u> production cost for <u>each</u> product if absorption costing is used. <table><tr><td></td><td>P1</td><td></td><td>P2</td><td></td></tr><tr><td></td><td>\$</td><td></td><td>\$</td><td></td></tr><tr><td>Direct materials</td><td>40</td><td>}</td><td>56</td><td>}</td></tr><tr><td>Direct labour</td><td>54</td><td>}(1)</td><td>150</td><td>}(1)</td></tr><tr><td>Production overheads W1</td><td>60</td><td>(1)</td><td>30</td><td>(1)</td></tr><tr><td>Production cost per unit</td><td><u>154</u></td><td>(1)OF</td><td><u>236</u></td><td>(1)OF</td></tr></table> W1 \$300 000/(4 000 × 4 + 2 000 × 2) = \$15 per machine hours \$15 × 4 = \$60 \$15 × 2 = \$30		P1		P2			\$		\$		Direct materials	40	}	56	}	Direct labour	54	}(1)	150	}(1)	Production overheads W1	60	(1)	30	(1)	Production cost per unit	<u>154</u>	(1)OF	<u>236</u>	(1)OF	6

Production overheads under absorption costing	60	}	30	} (1)OF both																																											
Increase / (decrease)	(12.60)	(1)OF	25.20	(1)OF																																											
2(d)	Advise the directors whether or not they should accept Peter’s proposal. Justify your answer. The business has a uniform pricing policy. (1) The business makes profit overall. If ABC is used, there is no impact on total profit (1) It simplifies pricing decision (1) The introduction of a new product may need a penetration pricing policy / low selling price at the beginning. (1) P2 appears to be of better quality (1) and so P2 could have a higher mark up. (1) With the introduction of ABC, the production overheads per unit of P1 have decreased so the mark up may be higher. (1) The price charged by competitors should be considered too. (1) Max. 6 for comments. Decision supported with a comment (1) Accept other valid responses.	7
