**MATHEMATICS****9709/25**

Paper 2 Pure Mathematics 2

**October/November 2025****1 hour 15 minutes**

You must answer on the question paper.

You will need: List of formulae (MF19)

**INSTRUCTIONS**

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

**INFORMATION**

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [ ].

This document has **16** pages. Any blank pages are indicated.

**BLANK PAGE**

**1** Find  $\int 6 \sin^2 x \, dx$ .

[3]

[illegible]

[illegible]

3 (a) Solve the equation  $|2x - 3| = |5x + 2|$ . [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) Hence solve the equation  $|2 \sec \theta - 3| = |5 \sec \theta + 2|$  for  $\pi < \theta < 2\pi$ . Give your answer correct to 3 significant figures. [3]

.....

**4** Solve the equation  $\cot \theta \tan(\theta + 45^\circ) = 7$  for  $0^\circ < \theta < 90^\circ$ .

[5]

This image shows a full page of white paper with horizontal dotted lines, typical of primary school writing paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

The diagram shows the curve with equation  $y = 8e^{-\frac{1}{2}x} - 1$ . The curve meets the axes at the points  $A$  and  $B$ . The shaded region is bounded by the curve and the line segment  $AB$ .

- (a) Show that the  $x$ -coordinate of  $B$  is  $6 \ln 2$ . [2]

.....

.....

.....

.....

.....

- (b) Find the area of the shaded region. Give your answer in the form  $p \ln 2 - q$ , where  $p$  and  $q$  are positive integers. [5]

[illegible]

**6** A curve has parametric equations

$$x = \tan \theta, \quad y = \sin \theta - 2 \sin^3 \theta,$$

for  $0 < \theta < \frac{1}{2}\pi$ .

(a) Show that  $\frac{dy}{dx} = 6 \cos^5 \theta - 5 \cos^3 \theta$ . [4]

[illegible]

- (b)** Find the equation of the normal to the curve at the point where it crosses the  $x$ -axis. Give your answer in the form  $y = mx + c$ , where  $m$  and  $c$  are exact constants. [5]

This image shows a full page of primary-ruled paper. It features approximately 20 horizontal dashed lines spaced evenly down the page, providing a guide for handwriting practice. The lines are thin and light gray, set against a plain white background. There are no margins, text, or other markings on the page.

7 The polynomial  $p(x)$  is defined by

$$p(x) = 2x^4 + kx^3 + kx^2 + 17x + 18,$$

where  $k$  is a constant. It is given that  $(x+2)$  is a factor of  $p(x)$ .

(a) Find the value of  $k$ .

[2]

[illegible]

It is given that the equation  $p(x) = 0$  has exactly two real roots, denoted by  $\alpha$  and  $\beta$ , where  $\alpha$  is an integer and  $\beta$  is not an integer.

**(b)** State the value of  $\alpha$  and show that  $\beta$  satisfies the equation  $x = \sqrt[3]{-2x-4.5}$ .

[4]

[illegible]

(c) Show by calculation that  $-1.4 < \beta < -1.0$ .

[2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(d) Use an iterative formula, based on the equation in part (b), to find the value of  $\beta$  correct to 3 significant figures. Give the result of each iteration to 5 significant figures.

[3]

- 8** The equation of a curve is  $y = 4e^{1-2x}\sqrt{3x-1}$ .

Find the exact coordinates of the stationary point of the curve.

[6]

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

DO NOT WRITE IN THIS MARGIN

Handwriting practice area with 20 horizontal dotted lines.
