October/November 2023

1 hour 30 minutes

No additional materials are needed.

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.

- The total mark for this paper is 60.
- The number of marks for each question or part question is shown in brackets [].

This document has **12** pages. Any blank pages are indicated.

Answer **all** questions.

- 1** In the study by Andrade (doodling), the participants were given a surprise recall test for two categories of information that was presented in the telephone message. One of these categories was the names of the party-goers.

- (a) Name the other category of information that the participants were asked to recall from the telephone message.

..... [1]

- (b) For the names of party-goers, 'false alarms' given by the participants were noted.

Outline the **two** types of false alarms given by the participants when recalling the names of the party-goers.

.....

 [2]

- 2** From the study by Piliavin et al. (subway Samaritans):

- (a) Outline what the model was supposed to do in the 'Critical area – early' condition.

.....

 [2]

- (b) Describe the victim in the drunk condition.

.....

 [2]

- 3 Explain **one** problem that could arise if children were used as participants in the study by Baron-Cohen et al. (eyes test).

.....

.....

.....

.....

.....

..... [3]

- 4 Saavedra and Silverman studied a boy with a phobia of buttons.

- (a) One aim was to investigate whether exposure to buttons would help to treat his phobia.

Outline **one** other aim of this study.

.....

.....

.....

..... [2]

- (b) Outline how the boy's severity rating for buttons changed during behavioural exposure sessions.

.....

.....

.....

..... [2]

- (c) State **two** results from the posttreatment assessment session.

1

2 [2]

- 5 In the study by Bandura et al. (aggression), the final part of the procedure was named the 'test for delayed imitation'.

(a) Describe the procedure used to 'test for delayed imitation'.

.....

.....

.....

.....

.....

.....

.....

..... [4]

(b) Outline **one** conclusion from this study.

.....

.....

.....

..... [2]

6 From the study by Dement and Kleitman (sleep and dreams):

(a) Describe the psychology being investigated in this study.

.....

.....

.....

.....

.....

.....

.....

..... [4]

(b) Explain why this study is from the biological approach.

.....

.....

.....

..... [2]

7 Suggest **two** real-world applications based on the study by Canli et al. (brain scans and emotions).

Your suggestions **must** be ethical.

1

.....

.....

.....

2

.....

.....

.....

[4]

- 8 Two friends, Rose and Yaroslav, are discussing the validity of the study by Milgram (obedience). Rose thinks the study has validity but Yaroslav thinks the study does **not** have validity.

Explain **one** reason why Rose is correct and **one** reason why Yaroslav is correct, using evidence from this study.

Rose (has validity)

.....

.....

.....

.....

.....

.....

Yaroslav (does **not** have validity)

.....

.....

.....

.....

.....

.....

[6]

- 9 (a) Describe the sample used in the study by Pepperberg (parrot learning).

.....

.....

.....

.....

.....

.....

.....

..... [4]

- (b) Explain whether each ethical guideline below, relating to animals, was broken in the study by Pepperberg (parrot learning):

housing

.....

.....

.....

pain and distress

.....

.....

.....

reward

.....

.....

.....

species and strain

.....

.....

.....

[8]

- 10 Evaluate the study by Laney et al. (false memory) in terms of **two** strengths and **two** weaknesses. At least one of your evaluation points **must** be about ethics.

[illegible]
